

I made my art work about my grandparent's house. I made it on their house because it is really fun there and we have a lot of fun over there. Every time my family goes over to their house I love it because we always have fun with everybody.

I made my art work with my grandpa. He is really good with wood so we made it with wood for the body. Then we put paint on the whole thing. We used green for the grass, we used rusty red for the sides, and we used black paper for the shingles. After the black dried on the roof we but black paper for shingles, we cut the paper into little squares to make the appearance of shingles. Then we used craft sticks to make a chair and beads to make a farmer.

This place is important to me because it is a very happy place for me and my family. Like I mentioned earlier it is a lot of fun with my whole family there. We always have a good meal with my family whenever we eat with the family because all the women in my family are good cooks.
