Draft/Structure

I want to use canon in my 90 second I think this device will help me to show my intent. I want to show the dancers dancing the same thing at different times to show that the community still has gaps and the dancers are able to work together quite yet but they are trying, because unlike before, now they are doing the same choreography as each other so its improved from before. For the 30 seconds I want to see that I can do to change the dynamics of them so that they are more interesting, but these are my base phrases that help me to develop my 90 second.
