Description of Community and Mosaic

While researching the word community, I found the definition that community is a group of people living together in the same place, or having a particular characteristic in common. Community is also a group of people with the same interests. Mosaic is a picture or many smaller pieces of color. I think mosaic is a like a kind of community, everyone no matter how unique they are, comes together to create a beautiful picture. I think that mosaic is like a way of showing that everyone is unique in their own way, and that being unique is what creates a bigger picture.
